ALL-IN-ONE Trend with footring

Article	9631	
Dimensions in mm	Backrest:	H 500
	Seat:	H 570 – 830 mm W 450 mm D 410 – 470 mm
	Weight:	17,0 kg
Packaging data	Volume:	0,25 m ³

Basic equipment

Seating surface and backrest	Ergonomically shaped backrest that is tapered towards the top.
	Ergonomically shaped seat. With integrated pelvic support and rounded front edge of the seat.

Upholstery elements	Duotec fabric upholstery: Available in black (6801), blue (6802), grey (6811)
	artificial leather upholstery: black (2571)
	Skintec upholstery: black (4000)

Seat height	Seat height adjustment continuously from 570-830 mm via safety gas spring with protective cover.
-------------	--

Mechanics	Synchronous technology with weight regulation
-----------	---

Benefits

Maximum freedom of movement. Allows a wide reach without sacrificing back support.

Automatically encourages a correct posture. The rounded front edge of the seat prevents blood from pooling in the thighs.

Fabric covers are particularly well-suited to clean environments. They are breathable and can absorb and release moisture. The ultra-soft surface ensures maximum seating comfort, even when sitting for long periods. The Duotec fabric is hard-wearing and can be cleaned with commercially available upholstery cleaning agents.

The PVC-free artificial leather is particularly quick and easy to clean. It is hard-wearing, easy to wash down, and resistant to oils and all commercially available disinfectants. The material is particularly soft and comfortable.

The innovative upholstery surface impresses with its aesthetics, and the soft upholstery core guarantees exceptional seating comfort. Not only is this upholstery extremely robust and hard-wearing – it's also particularly easy to care for and is resistant to commercially available disinfectants. The resistance to disinfectants has been tested and certified. The innovative production process excludes any environmentally harmful substances. Altogether, this makes Skintec the perfect combination of sustainability, comfort, aesthetics, hygiene and durability.

The height adjustment allows you to adapt the chair to your body size and workstation height. Wide adjustment range.

The angle of the seat and backrest is adjusted to suit the respective sitting posture. This enables dynamic sitting and relaxes the muscles, relieves pressure on the intervertebral discs, improves blood circulation, and significantly increases concentration and performance. The individual backrest pressure can be adjusted using a stepless weight control system.

ALL-IN-ONE TREND

	Seat tilt adjustment (up to 6°)	Many tasks are performed in a slightly elevated and forward-leaning position. A seat with an appropriate angle ensures a sitting angle of at least 90° while maintaining contact with the backrest.
	Seat depth adjustment (continuously adjustable by 60 mm)	Adjusts the depth of the seat to suit your height, providing optimal support for your thighs. Contact between the backrest and your back is maintained at all times, ensuring continuous support.
	Backrest height adjustment (60 mm)	Ensures that the person is ideally supported, especially in the lumbar region, regardless of their height
	quick adjustment	All functions can be conveniently and easily operated while seated using the control lever
	anti-shock protection	The backrest cannot swing forward unintentionally even after the lock has been released.
Base	Base black	Besonders leicht und robust
	Powder-coated steel profile pipe, black	Very high stability, durability, and sturdiness. Flat ends protect against tripping hazards.
Glides	Glides	Glides are particularly suited for workstations where a chair needs to offer firm support without sliding away, e.g. for activities that require a lot of strength. The glides are made of robust, abrasion-resistant plastic:
	Stop & Go castors	Stop & Go castors are also permitted for heights above 650 mm. The castors lock once someone sits down and therefore stop the chair from rolling away. When there is no load, they move freely and allow the chair to be moved easily. They therefore comply with the safety requirements of DIN 68877. Normal castors are not permitted above a height of 650 mm for safety reasons. The Stop & Go castors can also be retrofitted.
Foot ring	Chrome-plated height-adjustable foot ring.	Provides support thanks to its wide tread surface and can be adjusted quickly and easily in height.
Standards/certification	DIN 68 877 GS certificate for "tested safety" Quality management DIN EN ISO 9001 Environmental management DIN EN ISO 14001 Certified environmental management EMAS Occupational health and safety management OHSAS 18001 EcoVadis CSR rating 2015 Gold	High safety and comfort. High-quality product.
Warranty	10-year long-term warranty	Free shipping of replacement parts throughout the entire period.
