### Basic Equipment

### Benefits

Conductivity	Conductive coated steel parts Conductive comfort pads Typical leakage resistance of 106 ohms Volume conductive rollers	Exceeds the ESD properties specified in DIN EN 61340-5-1. 100% ESD safety.
Seating surface	Comfortable and extra-wide seat with 2 grab handles.	Particularly comfortable standing support thanks to the wide comfort seat. 60% of the body weight is supported by the seat, relieving pressure on the joints, ligaments, tendons, and spine, and protecting the circulation.
Upholstery	Integral foam padding ESD: black (2000)	Integral foam is particularly suitable for environments where aggressive substances such as chemicals, disinfectants, or moisture are present. Integral foam is also particularly resistant, robust, and durable.
Seat Height	Seat height adjustment continuously from 620-850 mm via self-supporting safety gas spring.	The standing aid offers optimal standing support thanks to its extra-large seat height adjustment range of 230 mm.
Mechanics	comfort seat	The comfort seat can be swiveled up to 20° to the left and right, expanding the range of motion for dynamic working with maximum comfort.
Base	Space-saving, stable base and robust stand column coated in brilliant silver, tilted forward by 4 degrees.	With every movement, the base ensures a secure footing in a slightly forward-leaning active working position. The small footprint does not get in the way and is trip-proof.
sliding block	sliding block	The interchangeable glides provide high stability and are suitable for all floor types.
Standards/certification	DIN 68 877 GS certificate for "tested safety" Quality management DIN EN ISO 9001 Environmental management DIN EN ISO 14001 Certified environmental management EMAS Occupational health and safety management OHSAS 18001 EcoVadis CSR rating 2015 Gold	High safety and comfort. High-quality product.
Warranty	10-year long-term warranty	Free shipping of replacement parts throughout the entire period
